INDEX TO VOLUME 88

"Starred items are Shorter Notes"

Abdelaziz, Nazar Hussein. *On the product of class A semigroups of linear operators*, 517.

Adolphson, Alan. *An analogue of Hilbert's Theorem* 90, 27.

Ahern, Patrick and Cohn, William. *A geometric characterization of N^+ domains*, 454.

Ancel, Fredric D., Duvall, Paul F. and Singh, S. *Rigid 3-dimensional compacta whose squares are manifolds*, 330.

An-Min, Li. *Some integral formulas for the hypersurfaces and a generalization of the Hilbert-Liebmann theorem*, 326.

Arendt, W. and Sourour, A. R. *Ideals of regular operators on l^2*, 93.

Assadi, Amir and Burghelea, Dan. *The nontriviality of the first rational homology group of some connected invariant subsets of periodic transformations*, 701.

Atalla, Robert E. *Local ergodicity of nonpositive contractions on $C(X)$*, 419.

Bagby, Richard J. *A note on the strong maximal function*, 648.

Bamón, Rodrigo. *A class of planar quadratic vector fields with a limit cycle surrounded by a saddle loop*, 719.

Bankston, Paul. *On partitions of plane sets into simple closed curves*, 691.

Barnsley, M. F., Geronimo, J. S. and Harrington, A. N. *Infinite-dimensional Jacobi matrices associated with Julia sets*, 625.

Barth, Theodore J. *The Kobayashi indicatrix at the center of a circular domain*, 527.

Beer, Gerald. *On functions that approximate relations*, 643.

Beesack, Paul R. *Riemann's function has an exponential bound*, 313.

Behncke, Horst. *Finite dimensional representations of JB algebras*, 426.

Belna, C. L., Obaid, S. A. and Rung, D. C. *Geometric conditions for interpolation*, 469.

Bennett, M. K. *Affine geometry: A lattice characterization*, 21.

Benyamini, Y. and Sternfeld, Y. *Spheres in infinite-dimensional normed spaces are Lipschitz contractible*, 439.

Berman, Simeon M. *Nonincrease almost everywhere of certain measurable functions with applications to stochastic processes*, 141.

Bivens, Irl. *Integral formulas and hyperspheres in a simply connected space form*, 113.

Block, Louis. *Critical points of one parameter families of maps of the interval*, 347.

Bray, William O. *On a Tauberian theorem for the L^1-convergence of Fourier sine series*, 34.

Bressoud, D. M. *A matrix inverse*, 446.

Brewster, Stephen and Homer, William. *Rational automorphisms of Grassmann manifolds*, 181.

Brezis, Haïm and Lieb, Elliott. *A relation between pointwise convergence of functions and convergence of functionals*, 486.

Bshouty, D. and Hengartner, W. *On analytic injective matrix functions*, 459.

Burghelea, Dan. See Assadi, Amir.

Các, Nguyễn Phuong. *On an elliptic boundary value problem not in divergence form*, 47.

Carothers, N. L. and Flinn, P. H. *Embedding $l_p^{n^\alpha}$ in $l_{p,q}^n$*, 523.

Case, B. A. and Quine, J. R. *Conditions for some polygonal functions to be Bazilevič*, 257.

Cegrell, Urban. *Removable singularity sets for analytic functions having modulus with bounded Laplace mass*, 283.

Cesari, L. and Kannan, R. *Existence of solutions of a nonlinear differential equation*, 605.

Chanillo, Sagun and Wheeden, Richard L. *A note on a maximal function of C. Fefferman and Stein*, 509.

Chau, T. C. *A note concerning Fox's paper on Fenchel's conjecture*, 584.

Chee, P. S. *On the extension of H^p-functions in polydiscs*, 270.

Cholewa, Piotr W. *The stability of the sine equation*, 631.

Chung, L. O. *Existence of harmonic L^1 functions in complete Riemannian manifolds*, 531.

Cohn, William. See Ahern, Patrick.

Croke, Christopher B. *On the volume of metric balls*, 660.

Daly, James E. *On the necessity of the Hörmander condition for multipliers on $\mathbf{H}^p(\mathbf{R}^n)$*, 321.
